

## MARGINI SONORI

sound set for titanical ears

**noise, industrial, electronic, body language, ambient, experimental**

Unconventional music set exploring the national and international panorama of a musical cave-like scene, mostly unknown but absolutely active and reactive; scene belonging to artists who perfectly represent the everyday life routine, projecting themselves to a far or close - who knows ? - allucinating future.

Each and every performed night flows among electronical music and pure noise, experimental and performance, ambient and industrial music, showing distant but original reality on a visual and musical level: even the most "traditional" listener will be captured.

**Art Direction: ODRZ** ([www.odrz.org](http://www.odrz.org))

On Tuesdays, 10 p.m., free entrance
